AUSTRALIAN NATIONAL GUIDELINES FOR THE MANAGEMENT OF HEALTHCARE WORKERS LIVING WITH BLOOD BORNE VIRUSES AND HEALTHCARE WORKERS WHO PERFORM EXPOSURE PRONE PROCEDURES AT RISK OF EXPOSURE TO BLOOD BORNE VIRUSES

The Communicable Diseases Network Australia (CDNA) has published these guidelines. The following is a summary of the requirements in the CDNA guidelines:

Healthcare workers who perform exposure prone procedures (EPPs) must take reasonable steps to know their blood-borne virus (BBV) status and should be tested for BBVs at least once every three years. They are also expected to:

- have appropriate and timely testing and follow up care after a potential occupational exposure associated with a risk of BBV acquisition
- have appropriate testing and follow up care after potential nonoccupational exposure, with testing frequency related to risk factors for virus acquisition
- cease performing all EPPs if diagnosed with a BBV until the criteria in the guidelines are met, and
- confirm that they comply with these guidelines when applying for renewal of registration if requested by their board.

Practitioners who are living with a blood-borne virus and who perform

exposure-prone procedures have additional requirements. They are expected to:

- be under the ongoing care of a treating doctor with relevant expertise
- comply with prescribed treatment
- have ongoing viral load monitoring at the appointed times
- not perform EPPs if particular viral load or viral clearance criteria are not met (see detailed information in the guidelines according to the specific BBV)
- seek advice regarding any change in health condition that may affect their fitness to practise or impair their health
- release monitoring information to the treating doctor
- if required, release de-identified information to the relevant area of the jurisdictional health department/Expert Advisory Committee, and
- if required, release health monitoring information to a designated person in their workplace in the event of a potential exposure incident to assess the requirement for further public health action.

Additional information can be found in the CDNA Australian National Guidelines for the Management of Healthcare Workers Living with Blood Borne Viruses and Healthcare Workers Who Perform Exposure Prone Procedures at Risk of Exposure to Blood Borne Viruses available online at https://www.health. gov.au/resources/collections/cdna-national-guidelines-for-healthcareworkers-on-managing-bloodborne-viruses?language=en

This must be relevant to your context of practice. If you were granted registration less than 12 months ago, your CPD requirements will be based on how many months you have been registered:

INFORMATION ON THE PUBLIC REGISTER

Information in this form marked with an asterix (*) indicates the information that will be displayed on the online public register of practitioners. If you believe that publishing information about you on the public register would pose a serious risk to your health or safety as a practitioner, please complete an *Application to exclude information from the public register* – *AEPR-00* available at www.nursingmidwiferyboard.gov.au/Registration-and-Endorsement/Forms

IMPAIRMENT

The National Law defines impairment as 'a physical or mental impairment, disability, condition or disorder (including substance abuse or dependence) that **detrimentally affects or is likely to detrimentally affect your capacity to practise the profession**'.

But an illness or health condition that is safely managed is not the same as impairment, as these do not have a detrimental impact on your capacity to practise. Examples of what you do not need to declare include:

- wearing prescription glasses to correct your vision or hearing aids to correct your hearing, or
- seeing a psychologist for anxiety and following a treatment plan.

PRACTICE

Practice means any role, whether remunerated or not, in which you use your skills and knowledge as a health practitioner in your profession. Practice is not restricted to the provision of direct clinical care. It also includes using professional knowledge in a direct non-clinical relationship with clients, working in management, administration, education, research, advisory, regulatory or policy development roles and any other roles that impact on the safe and effective delivery of services in the profession and/or use of their professional skills.

PROFESSIONAL INDEMNITY INSURANCE (PII)

You cannot practise the profession in Australia without PII. You must maintain it through your own private cover, your Australian employer or another third party, and ensure you understand it.

But you are not required to hold PII if you are unemployed or working overseas.

Remember, practising means using your skills and knowledge as a health practitioner in any paid or unpaid role in your profession.

For more information, view the registration standard online at www.nursingmidwiferyboard.gov.au/Registration-Standards

RECENCY OF PRACTICE

You must maintain an adequate connection with your profession and regularly practise it after you qualify for or receive your registration. For nurses and midwives this means you have practised for at least 450 hours over the last 5 years. The NMBA's recency of practice requirements also apply to an endorsement for scheduled medicines or as a nurse practitioner. If you are unable to meet the recency of practice requirements the NMBA

requires you to submit evidence to support your re-entry to practice. Re-entry to practice may require you to complete specific education and/or supervised practice.

For more information, view the registration standard online at www.nursingmidwiferyboard.gov.au/Registration-Standards and the re-entry to practice policy at www.nursingmidwiferyboard.gov.au/ Registration-and-Endorsement/reentry-to-practice
