Subject: Feedback about English Requirement for Nursing registration

Respected Kathleen,

I would like to thank you first for giving us the opportunity to express our views on the draft of English Language requirement. I am one of the Nursing students studying at Flinders University, SA. I have gone through the draft and

It relieved my stress as there is possibility that AHPRA would consider those graduates, who have completed their tertiary education from English medium University, to be eligible for registration by meeting the English Requirement of the board without appearing in any English Language testing system. It is very good idea and we will highly appreciate if that happens!

Thank you again.
