Hi all

Greetings from me

In my opinion all international students should get IELTS 7.0 in all modules even if the candidate studied in English medium they can't perform in English well ( in writing, speaking, reading and listening)

But you can give a concession to the students those who are coming to Australia to do bachelor of Nursing- Post Registration (BNP to BN programme students).Because I think they will be eligible after completion of their 1.5 years study there in Australia....During this time they get time to study Australian Culture and Your language style and all. So you can consider them for registration after successful completion of the course

Thanks and regards

Jairaj Thomas
