**Subject:** Nurses IELTS requirement

Dear Madam,

I am writing to say something about the IELTS requirement for nurse.

Firstly, I would like to say something about IELTS exam. IELTS way of calculating english is very strange. If one student got 7 band in one module, how that score goes to 6 in next exam after a month. Either examiner was wrong first time or he is wrong this time. Many students got 7 in three modules but 6.5 or 6 in fourth. In next attempt, students cover this low score to high, but this time score go low in some other module.

If you make IELTS requirement overall 7 and minimum 6 or 6.5 in each module, it will really work.

Hope for a great outcome.

Regards.
