To,

Dr Lynette Cusack /Ms Anne Morrison

Thanking you, for NMBA consults on English Language Skills Registration Standard from the profession, the community and all

We can never ever judge against IELTS/OET and secondary or nursing education in English, if its in English speaking countries secondary or nursing education we may still accept, how can we accept other countries (different native languages) English secondary or nursing education. Their spoken language will be their own,

IELTS or OET these are ideal tests for anyone's English knowledge, let IELTS - 7.0, OET - B to be recommended assessment Registered nurse or Enrolled nurse English skills. In place of secondary and nursing studies in English. Could be these above tests score a little lower for Enrolled nurses.

KHall, RN working in aged care
